Brief Explanation of Construction Types: All buildings are classified according to their construction type. Type I is least combustible and Type V is most combustible. The difference in A or B for a given construction type is the level of fire resistance construction rating (A is "protected" and B is "unprotected"). Below is a description of each construction type.

Type I (IA or IB): Constructed of noncombustible materials (typically concrete frame buildings)

Type II (IIA or IIB): Constructed of noncombustible materials (typically masonry bearing walls with steel framing)

Type III (IIIA or IIIB): Exterior walls are of noncombustible materials and the interior building elements are of any material permitted by code (combustible or non-combustible)

Type IV: Heavy timber (HT) construction

Type V (VA or VB): Constructed of any materials allowed by code. Most residential construction in Lane County is Type VB

Additional Fees and Surcharges

The following fees and surcharges, while not levied by the Building or Electrical Programs, are applied to building and electrical permits and incorporated into the total permit fee to be collected at the time of permit issuance. As these can constitute a significant portion of your permit fees, a brief summary is included here in the Building & Electrical Program Fee schedule for your reference.

Surcharges and Fees Typically Applied to Building and Electrical Permits

State Surcharge (LM 60.855(12) and ORS 455.210, 220)

Calculated as a percentage of building permit fees or hourly fees in lieu of permit and is forwarded to the State of Oregon Building Codes Division..... 12%

Land Management Division Administrative Fee (LM60.850(8))

Calculated as a percentage of total permit fees, supports the activities of the LMD Administration Program. 15%

Long Range Planning Surcharge (LM60.850(9))

Calculated as a percentage of total permit fees, supports the activities of the Long Range Planning Program within LMD. 13%

Land Management Division Technology Assessment (LM 60.855(6))

Transaction of \$100 or less	\$10.00
Transactions over \$100	\$50.00

Construction Excise Tax

Applies to construction within certain school districts in Lane County. The Construction Excise Tax is assessed as a dollar rate per square foot of residential and/or non-residential construction which is collected by LMD and forwarded to the school district assessing the tax for capital improvement project funding. Rates vary among districts, contact LMD Administration or specific school district for more information.

Fee Collection

At the time a permit application for simple mechanical, plumbing or electrical scopes of work are taken in the total fee for the permit can be calculated based on the items listed on the application. This fee is collected in full at the time of application. However, the total fee for more complex permit applications (commercial structures, dwellings, accessory structures, etc.) that require land use, sanitation and other approvals can not necessarily be calculated at the time of application. For this reason, a permit intake fee is collected at the time of application in lieu of full fees. The permit intake fee is the sum of fees associated with foreseeable services that will be rendered in processing the permit prior to issuance. This includes fees associated with applicable plan check, addressing, planning review and approval, sanitation review and approval, as well as local surcharges on these amounts. Once the application is approved and all fees are known, the balance of the total fees will be owed. The balance will include fees for any review that was completed but not included in the intake fee, fees associated with inspection services to be rendered once the permit is issued, and applicable local and state surcharges.

Since the intake fee varies with each permit and is not known until your application is reviewed, please be prepared to pay the calculated amount at the time of application. You may reference the calculation sheet at the end of this guide to help you estimate the fees included in the permit intake fee and get a general assessment of the amount that will be owed at time you submit your application.
